Build an audit that follows risk

A practical two-day experience for auditors who want to connect modern risk assessment, professional judgement and responsible AI across the financial statements audit.

01

Practical risk assessment

Identify and assess risks that genuinely drive the audit approach.

02

AI-powered audit planning

Use AI to strengthen scoping, procedure design and documentation—not replace judgement.

03

End-to-end audit workflow

Connect planning, fieldwork, evidence, review and reporting in one coherent process.

04

Hands-on application

Work through realistic scenarios and leave with methods you can use immediately.

More than two days in the room

Verifiable CPD certificate

Evidence of professional development you can retain and verify.

Comprehensive learning materials

Structured resources for use during the programme and afterward.

3 free ATI online CPD codes

Continue learning through the Auditor Training Institute after the workshop.

Facilitated practical exercises

Apply risk assessment and AI-supported planning to realistic audit situations.

Two full learning days

9:00 AM to 4:30 PM each day at Miklin Hotel.

WHO SHOULD ATTEND

External auditors, audit seniors and managers, sole practitioners, engagement leaders, methodology specialists, and finance professionals who support assurance work.

Two locations. One practical experience.
